INFORMATION TECHNOLOGY

Computers, Servers & Networking

IT is one of the fastest growing industries in the world. Are you interested in a challenging, dynamic career? Apply for CSN. Students work in an up-to-date lab setting, learning with a hands-on, problem-based approach. We learn to troubleshoot computers and networks, learn and develop for the Internet of Things, Raspberry Pi, and cloud computing. Successful students earn on the job skills, CompTia certifications, up to 25 college credits, English equivalency credit, and skills that last a lifetime.

- Ability to read and follow written directions, interest in IT, problem solving skills, strong work ethic, ability to work well in teams.

Video Game Design

Prerequisite: Successful completion of Algebra 1. Students learn to design and create video games using trigonometry and higher math, computer programming in C#, and 2D computer animation. This course prepares students with skills necessary for the video game industry's biggest needs: qualified video game designers and programmers. Students work toward industry certifications such as Unity Certified Developer. This is a math intensive program. Successful students can earn an English and an Algebra 2 or Geometry equivalency credit.

- Ability to work in teams, time management for projects, motivation. Computer classes suggested, but not necessary.

Electronics Engineering Technology

Prerequisite: Successful completion of Algebra 1. Electronics - The technology that puts the E in Everything! Love projects? You will create at least two major projects focusing on understanding systems and troubleshooting. This is a hands-on, applications based class. Learn about components, circuit design and programming. An opportunity to build an electric guitar and solar panel is available to the motivated student. Use of test equipment and hand tools is emphasized. Successful students earn college credits in Engineering Technology. This is a math intensive program. Students can earn a Math equivalency credit.

- Enjoy working with your hands & problem solving; self-starter.

Animation

Animation is an ever-expanding occupation marked by originality, hard work and a love of the job. Successful animators are capable of an impressive income and, more importantly, enjoying what they do. The primary goal of this course is to build the foundation necessary for students who want careers in animation for video game art or animation for film. Many topics are covered, including portfolio development, manual and 3D modeling, project management, storyboarding, rendering, and animation shorts, among others. Students can earn Fine Arts and Geometry equivalency credit.

- Comfortable with group collaboration but also work well individually. Successful completion of Drawing or Art classes are a plus, but not required!

SCIENCE & HEALTH

Dental Assisting

Prerequisite: Successful completion of Biology and Health. Dental Assisting is a blend of health, science, and people skills. Gain experience in teamwork, communication, and technical skills for your transition into a dental profession. Includes pre-clinical and clinical sciences, OSHA safety standards, and a 7 hour HIV/AIDS training, to assist in qualification for state registration as a Dental Assistant. Employment opportunities are available in the Puget Sound area. Continue your education to become a Dental Hygienist or a Dentist!

- Teamwork, respect, accountability, attendance, organization. **A grade of 80% or better is required by end of 1st semester to remain in program for 2nd semester.**

Medical Assisting

Prerequisite: Successful completion of Biology and Health. This course will help jumpstart college or a career in the medical field. Learn the language of health care professionals. Take blood pressure, temperature, pulse, respiration, height, and weight. Perform vision screening, surgical scrub, CPR, and First-Aid, and learn office skills and medical instruments. Participate in Spring internships at a health care facility. Earn up to 8 college credits.

- A high school reading level due to college level text. **A grade of 80% or better is required by end of 1st semester to remain in program for 2nd semester.**

Nursing Assistant

Prerequisite: Successful completion of Biology and Health. Pass a criminal background check, drug screen, and have a current Social Security Number. Wondering if the world of healthcare is right for you? Take the first step by becoming a CNA. The successful student will complete the course with a Washington State Certification. Experience learning basic patient care in the classroom and lab and then give that care to patients in a long term care setting. You'll be immediately employable after certification; this is a high demand occupation. Earn up to 17 college credits.

- Strong work habits, good attendance, an empathetic person who enjoys caring for others! **A grade of 80% (B) or higher is required by end of 1st first semester to be eligible for second semester and patient care.**

Veterinary Assisting

Prerequisite: Successful completion of Biology and Health. Ideal program for students interested in a fast-paced, high intensity, animal-related career. Learn theory and skills needed to become a veterinary assistant. Investigate animal careers and advanced schooling options. Gain experience through classroom activities and daily handling of our resident animals, in a setting that models industry work sites. Use your knowledge and skill to complete a 100 hour internship at an animal care facility.

- Biology, Chemistry, math, and a strong work ethic. **A grade of 80% or better and instructor approval, is required by end of 1st semester to remain in program for 2nd semester.**

BUSINESS, MARKETING & MANAGEMENT

Cosmetology 1 (Sno-Isle TECH Campus)

This is an introductory course offered on the Sno-Isle TECH campus for 11th or 12th grade students. Students will practice basic Cosmetology services such as shampooing/draping, hair analysis/treatment, hair cutting, natural nail care, basic skin care, temporary hair removal, wet styling, thermal styling, permanent waving, chemical relaxing, hair coloring/lightening, safety measures and decontamination control in a closely supervised lecture/lab class. Students practice on models, mannequins, and each other. The curriculum framework is provided by the Everett Community College Cosmetology program, where students completing this program may have the opportunity to continue their training.

- Enjoy working with people, good communication skills, highly motivated, focused, have good eye and hand coordination, good attendance, creativity and flexibility.

EvCC Cosmetology

Students enroll in the EvCC Cosmetology program. Sno-Isle TECH subsidizes a portion of the tuition if attaining a passing grade. Students are required to purchase their own beauty kit and iPad (See cost list for details). Training begins during fall quarter of 12th grade, continues through the 12th grade year, plus additional quarters to complete 1730 clock hours for a Washington state Cosmetology License. Students who take this class after completing Cosmetology 1 course (above) with a C or better, can transfer their hours, and save about \$2500.00 allowing for a shorter completion time.

Culinary Arts

Great restaurants are known for their chefs, and great chefs are known for their education. This program lets you experience working in a real restaurant—our own! This is a fast paced, hands-on class—with emphasis on contemporary culinary techniques, under the direction of a professional chef. Understand what makes good food great and what makes great food outstanding. Get a glimpse of the skills needed to manage a business. Discover the fun of making wonderful food, providing professional service, and learning valuable, marketable skills.

- Good math skills, strong work ethic, effective communication skills, ability to multi-task under pressure, dependable team player.

Fashion and Merchandising

The world of fashion is exciting, fast paced, and creative. Channel your sense of style and your business savvy into a career. This program surveys the fashion industry with emphasis in retail, wholesale, manufacturing, textiles and design. Seattle is fourth in the nation in the fashion industry, with a variety of careers available. We are home to Nordstrom, Tommy Bahama, Zulily, Amazon, Brooks Shoes, and more! Let us help you develop your talents from Designing a Line of Clothing, Visual Communication, Social Media & Marketing, E Commerce and Project Management/Event Planning! You will gain practical knowledge and learn what it takes to succeed in the business of fashion.

- Interest in the fashion business; strong work ethic, team player, ability to multi-task, retail math skills.

HUMAN SERVICES

Careers in Education

Have you ever considered a career in public education? Do you enjoy working with kids, and like helping or explaining things? You may immediately think of being a teacher, but there are so many more careers in education that offer decent pay, health benefits, and a great schedule. This course explores all the aspects of educational careers, focusing primarily on teaching, and includes internships so you will begin building your resume right away. Plus, you'll be prepared to take the Washington State Para-Educator Test for Certification right after graduation, so you can start working in the field immediately and make a difference for others!

- Desire to help others, a self-starter, positive attitude, love of learning, strong work ethic and ability to work with others.

Criminal Justice

Students will have extensive exposure to the career opportunities within law enforcement. The class has numerous guest speakers, field trips, and a lethal force decision making simulator. Students receive professional training in handcuffing, weaponless defense scenarios, First Aid and CPR. Students accepted into this program must have personal integrity. Subject matter can be very intense, dealing with the complexity of morals, ethics, civil liberties, civil rights, cultural diversities, case law and current events. Disqualifiers for law enforcement employment include history of continual illegal drug use, felony or domestic violence convictions.

- Competency in English (writing and comprehension); willing attitude to master material and demonstrate physical skills; common sense and sound reasoning.

Fire Service Technology

If you want to be a Structural or Wildland Firefighter as well as develop your self-confidence, leadership and teamwork, then register for Fire Service Technology. This one year program follows the I.F.S.T.A. (International Fire Service Training Association) Essentials Curriculum while teaching firefighting and emergency medical skills. Students will work in a classroom setting as well as outside in inclement weather completing field and drill activities.

- Good communication skills, positive attitude, and desire to work hard.

Translation and Interpretation

Pre-requisite: Bilingual and Bi-literate in English and another language [minimum of 2 credits in English and 2 credits in World Language (or equivalent)]. Are you a bilingual student with an interest in helping others? Do you ever help interpret for friends or family? Have you ever considered earning a living by translating and interpreting in a Medical, Educational, or Legal setting? In this safe and supportive environment, learn how to accurately and professionally transfer communication from one language to another in written and verbal form. Develop your own professional portfolio and practice your skills through job shadows and internships. Finally, prepare for the Washington Certification Exam and have the opportunity to walk out the door ready to be paid for your hard work!

- Listens attentively, communicates clearly, works well with and enjoys helping others.

TRADE & INDUSTRY

Aerospace Manufacturing & Maintenance Technology

The program provides basic training in aircraft assembly and maintenance. A combination of textbook assignments, lectures, shop activities and teamwork incorporate the goal of preparing students for entry level training programs in local aerospace manufacturing companies and community/technical colleges. We focus on safety, tool identification and proper use, and technical skills - drilling, deburring, riveting and fastener installation on aluminum and titanium.

- The ability to read technical texts and service manuals. Basic math skills including decimals, fractions, percentages, and formulas. Work independently to complete projects. Solve problems, and complete project tasks.

Automotive Technology

Skilled Automotive Technicians are in high demand! If you are interested in a career as an Automotive Technician, this is the program for you! The auto industry is seeking skilled people who can diagnose and repair the complex technology in today's vehicles. In our Auto Tech program, students learn to repair various systems of a vehicle using an interactive web-based curriculum and NATEF tasks and guidelines. Our students have the opportunity to work in an active auto shop where skills are applied in a job-like setting. This is a technical, preparatory program and requires high-level skills to be successful. It is not for the hobbyist!

- Be responsible for your learning; have high school level math, reading and writing skills. Communicate, think, act professionally, and solve problems.

Auto Body/Collision Repair

The program provides training in auto body work using a combination of textbook assignments, lectures, labs, demonstrations, and teamwork. Auto Body/Collision Repair focuses on safety, tool identification and proper use, vehicle construction, minor body repair, sanding, painting components and techniques, estimating damaged vehicles, welding and other technical skills. The program includes use of I-CAR professional training program and certification.

- Strong work ethic, understand and follow written and verbal instructions, critical thinking, self guidance and team collaboration.

Construction Trades

Want to join a construction company and be introduced to many different jobs in the industry? Students will learn about job safety, framing, roofing, siding, stairs, rafters, basic rigging, and many different projects using the tools of the trade such as a table saw, disc sander, skill saw, band saw, and various hand tools. This program is coordinated and sponsored in partnership with the NCCER (National Center for Construction Education and Research) and CITC of Washington (Construction Industry Training Council). With successful completion of this program, students will receive a National Certificate of Completion of Core Curriculum.

- Ability to follow verbal and written direction; problem solving skills, ability to work in groups, strong work ethic.

TRADE & INDUSTRY

Diesel Power Technology

The Diesel Power Technology program prepares students for an entry level position in the heavy duty industry. While working with actual trucks and equipment, students learn in 7 areas of study. With changes in environmental regulations and safety, there is an emphasis on technology and diagnostics. Students enjoy this hands-on learning environment.

- Strong work ethic, ability to understand and follow written and verbal instructions; basic math including fractions and decimals, critical thinking, self guidance and team collaboration. Organizational skills are also essential.

Advanced Manufacturing

Almost everything you own was made by machinists or with tools made by machinists. Machining students plan and make precision finished parts from raw material using lathes, mills, and CNC (computer numerical control) machines. This can be the beginning of a great career or a vital stepping-stone toward many college degree careers. For example, the best and highest-paid engineers have machining skills. *New this year - Youth Apprenticeship Opportunity available in this class.

- Positive attitude, ability to listen and follow instructions, self-starter and team collaboration, basic math skills.

Welding & Metal Fabrication

This industry based shop environment is designed for the student who would like to receive a general metal working background as a foundation for continuing education or a living-wage career. Welding, fabrication and safety are taught with a blend of lecture, assignments and hands-on competencies that maintain the student's interest and foster a deeper appreciation of the trade.

- Strong work ethic, positive attitude, understand and follow written and verbal instructions, basic math skills, motivated self-starter, work as a team member.

Key

- Class has lab fee
- Class offers college credit
- Class offers industry certification
- Class offers HS equivalency credit. ***Check with your district for equivalency acceptance.**
- Competency based test required for additional college credit.
- Keys to Success
